Health and Safety

- Please keep to the path for your own safety and to avoid disturbing wildlife.
- Please stay away from cliff edges and the gloups.
- This is a working farm. Please keep dogs under control to prevent disturbance to wildlife.
- Please wear sensible shoes and clothing. The weather can change quickly.
- Please shut gates.

Join us

Membership of SWT gives you free entry to all our visitor centres and helps to support our wildlife reserves. You will also receive our exciting magazine to keep you up to date. Why not try volunteering?

We are grateful to the Viking Heaths Project, an initiative supported by the Heritage Lottery Fund and managed by the Faming and Wildlife Advisory Group (FWAG) for supporting this project. The aims of the project are to restore and recreate heathland in Orkney while improving access to and increasing awareness of this globally threatened habitat.

Welcome to Hill of White Hamars Wildlife Reserve

This wildlife reserve is famous for its wildflowers. Over 180 different kinds of flowers grow here, many along the cliffs where the land has never been ploughed or fertilised. Hill of White Hamars is a working sheep farm and careful grazing is essential for the wildflowers to survive. The Scottish Wildlife Trust is working to conserve this rare habitat which is globally threatened.
