

Bird Beak Lab – Activity sheet

Instructions!

1. Carefully cut out each bird and bird name separately.
2. Match each bird to its correct species name.
3. Now group your birds into those with short beaks and those with long beaks.

Short beaks - useful for catching fish and small creatures like insects and plankton

Long beaks - help pin down fish and dig in the sand

Little Egret

Guillemot

Little Auk

Curlew

Puffin

Herring Gull

Arctic Tern

Gannet
